

SCENARIO BUILDER SOFTWARE

D.P. Associates

Intuitive, Intelligent and Diverse Training Solutions

“It’s an effective, affordable way to screen new drivers. Just click, drag, and drop.”

Create your own scenarios quickly and efficiently, with no computer programming experience needed. DPA’s Scenario Builder Software allows you to customize scenarios to enhance your driver training curriculum. It’s an effective, affordable way to screen new drivers. Just click, drag, and drop. It’s that simple.

- Build customized scenarios in under thirty minutes.
- Build geotypical scenarios for accident remediation, employment pre screening for new drivers and targeted training for existing drivers.
- Easily and affordably create training content for classroom presentations.
- Add new challenges to accommodate any experience level.
- Control the sequence and timing of event triggering.
- View scenarios from any angle, including top-down view for vehicle positioning.

- Create scenarios on a separate PC and transfer the information to the simulator with a flash drive.
- Compatible with any standard desktop or notebook PC with 3D graphics capability.

OBJECT LIBRARY

We have an extensive library of over 300 objects for you to add to your scenarios: trucks, cars, trees, pedestrians, signage, and much more. This vast selection allows you to truly customize each training session.

REAL-WORLD ENVIRONMENTS

Choices include suburban, freeway, rural and driving range settings. Optional environments include urban, swamp, Middle East, driving track and skid pad.

SCENARIO BUILDER SOFTWARE

Military, Government, and Commercial Clients

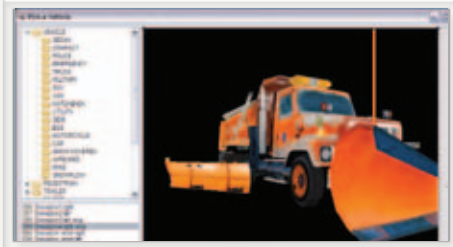

DYNAMIC FEATURES

To Challenge Your Operators,
Choose From:

Vehicle types, including sedans, SUVs, sports cars, trucks, fire trucks, ambulances, school buses, transit buses, coaches, vans, law enforcement vehicles, taxis, and tractor-trailers.

Weather patterns, including rain, ice, snow, fog, night, wind and sun glare.

Other visual stimuli, including traffic signs, traffic signals, barricades, cones, fire hydrants, bicycles, skateboards, motorcycles, men, women, children, dogs, cows, and deer.

You can "trigger" events to occur, from sudden fog to a deer in the road

GRAPHIC DISPLAYS

Use our interactive graphic displays for scenario design and development.

Review and revise newly created scenarios in both 2D and 3D views. Note that the design changes and updates are shown dynamically and react correctly to a student's driving response.

Drag-and-drop capability lets you add items quickly and easily to adjust scenarios to fit specific needs or conditions.

3D views help you review finished work.
